

RAKOVINA THERAPEUTICS INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS

FOR THE THREE MONTHS ENDED

MARCH 31, 2023

RAKOVINA THERAPEUTICS INC.

Management's Discussion and Analysis
For the three months ended March 31, 2023

The following management's discussion and analysis ("MD&A") for the three months ended March 31, 2023 should be read in conjunction with the unaudited interim condensed consolidated financial statements of Rakovina Therapeutics Inc. ("Rakovina" or the "Company") for the three months ended March 31, 2023 and the annual audited consolidated financial statements and accompanying notes for the year ended December 31, 2022 (the "Annual Financial Statements"), which have been prepared by management in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). Our IFRS accounting policies are set out in note 2 of the Annual Financial Statements and all dollar amounts are expressed in Canadian dollars unless otherwise noted.

This MD&A is dated May 30, 2023

FORWARD-LOOKING STATEMENTS

Certain statements and information in this MD&A contain forward-looking statements or forward-looking information under applicable Canadian securities legislation that may not be based on historical fact, including, without limitation, statements containing the words "believe", "may", "plan", "will", "estimate", "continue", "anticipate", "intend", "expect", "predict", "project", "potential", "ongoing", "could", "would", "seek", "target" or the negative of these terms or other comparable terminology, although not all forward-looking statements contain these words and similar expressions.

Forward-looking statements are necessarily based on estimates and assumptions made by us in light of our experience and perception of historical trends, current conditions and expected future developments, as well as factors that we believe are appropriate. Forward-looking statements in this MD&A include, but are not limited to, statements relating to:

- the initiation, timing, cost, progress and success of our research and development programs;
- our ability to safely dose, re-dose, formulate and develop drug candidates;
- our ability and our current and potential future partners' ability to advance product candidates into, and successfully complete, clinical trials;
- the expected therapeutic benefits, effectiveness and safety of our product candidates, including our belief that our approach may reduce the risk, time and cost of developing therapeutics by avoiding some of the uncertainty associated with certain research and pre-clinical stages of drug development;
- our ability to obtain funding for our operations, including funding for research and commercial activities;
- our ability to obtain marketing approval for any of our products and to achieve profitability;
- our ability to establish and maintain relationships with collaborators with acceptable development, regulatory and commercialization expertise and the benefits to be derived from such collaborative efforts;
- our ability to enter into agreements or partnerships with pharmaceutical or biotechnology companies that have sales and marketing capabilities, which will enable us to increase our returns from our product candidates or to further accelerate development of our product candidates;
- the manufacturing capacity of third-party manufacturers for our product candidates;
- the implementation of our business model and strategic plans;
- our ability to protect our intellectual property and operate our business without infringing upon the intellectual property rights of others;
- our expectations regarding federal, provincial and foreign regulatory requirements;
- the timing of, and our ability and our collaborator's ability, and the costs of obtaining and maintaining, regulatory approvals in the United States, Canada and other jurisdictions for our product candidates;
- the rate and degree of market acceptance and clinical utility of our future products, if any;
- our expectations regarding market risk, including interest rate changes and foreign currency fluctuations;
- our ability to engage and retain the consultants or employees required to grow our business;
- the compensation that is expected to be paid to consultants or employees of the Company;
- our future financial performance and projected expenditures;
- developments relating to our competitors and our industry, including the success of competing therapies that are or become available;
- our expectations regarding the kt-2000 series, kt-3000 series and kt-4000 series candidates;
- our expectations regarding the size and growth of the cancer therapeutics and PARP-inhibitor markets; and estimates of our expenses, future revenue, capital requirements and our needs for additional financing

Such forward-looking statements reflect our current views with respect to future events, are subject to risks and uncertainties and are necessarily based upon a number of estimates and assumptions that, while considered reasonable by Rakovina as of the date of such statements, are inherently subject to significant medical, scientific, business, economic, competitive, political and social uncertainties and contingencies. Many factors could cause our actual results, performance, achievements, prospects or opportunities to be materially different from any future results,

RAKOVINA THERAPEUTICS INC.

Management's Discussion and Analysis
For the three months ended March 31, 2023

performance or achievements that may be expressed or implied by such forward-looking statements. In making the forward-looking statements included in this MD&A, the Company has made various material assumptions, including, but not limited to: (i) obtaining positive results of preclinical research and clinical trials; (ii) obtaining regulatory approvals; (iii) assumptions regarding general business and economic conditions; (iv) assumptions regarding the cost and timing of each study; (v) that the Company's current positive relationships with third parties will be maintained; (vi) the availability of financing on reasonable terms; (vii) the Company's ability to attract and retain skilled consultants; (viii) assumptions regarding market competition; (ix) the products and technology offered by the Company's competitors and (x) the Company's ability to protect patents and proprietary rights.

In evaluating forward-looking statements, current and prospective shareholders should specifically consider various factors, including the risks outlined herein under the heading "*Risk Factors*". Should one or more of these risks or uncertainties, or a risk that is not currently known to us, materialize, or should assumptions underlying those forward-looking statements prove incorrect, actual results may vary materially from those described herein. These forward-looking statements are made as of the date of this MD&A and we do not intend, and do not assume any obligation, to update these forward-looking statements except as required by applicable securities laws. Investors are cautioned that forward-looking statements are not guarantees of future performance and are inherently uncertain. Accordingly, investors are cautioned not to put undue reliance on forward-looking statements.

COVID-19 Update

In March 2020, the World Health Organization declared the COVID-19 outbreak a global pandemic and the Company continues to evaluate the COVID-19 situation and monitor any impacts or any potential impacts to the business. Rakovina has implemented health and safety measures in accordance with health officials and guidance from local government authorities. While the pandemic has had a limited impact on the Company's operations to date, future research activities could be impacted as a result of the pandemic. As the COVID-19 health crisis continues, the Company will continue to rely on guidance and recommendations from local health authorities, Health Canada and the Centers for Disease Control and Prevention to update the Company's policies.

COMPANY OVERVIEW

Rakovina Therapeutics Inc. (the "Company" or "Rakovina") was incorporated under the *Business Corporations Act* (British Columbia) on May 6, 2019, under the name "Vincero Capital Corp." On February 7, 2020, the Company listed its shares on the TSX Venture Exchange ("TSX-V") as a capital pool company ("CPC") (as defined in the TSX-V Policy 2.4 – *Capital Pool Companies*). On March 25, 2021, the Company completed a qualifying transaction with NewGen Therapeutics Inc. by way of a "three-cornered" amalgamation, in which: (a) a subsidiary of NewGen (the "Subco") was amalgamated with a wholly-owned subsidiary of the Company ("Vincero Subco") to form an amalgamated company ("Amalco"); (b) all issued and outstanding shares of the Subco were exchanged for shares of the Company on a 1:1 basis; (c) all issued and outstanding warrants of the Subco were replaced by warrants of the Company on the same terms; and (d) Amalco became a wholly-owned subsidiary of the Company. The Qualifying Transaction was a reverse-takeover of the Company and upon completion thereof, the Company changed its name to "Rakovina Therapeutics Inc.". On April 1, 2021 following the completion of the Qualifying Transaction, the common shares of the Company (the "Common Shares") resumed trading on the TSX-V under the symbol "RKV". The Company's first financial year-end subsequent to the completion of the Qualifying Transaction was December 31, 2021. Subco has been identified for accounting purposes as the acquiror, and accordingly the reporting entity is considered to be a continuation of Subco and the net assets of Vincero are deemed to have been acquired by Subco.

Following completion of the Qualifying Transaction, the Company continued to conduct the biotechnology business previously conducted by Subco until March 23, 2021, when Subco and a subsidiary of the Company were amalgamated, with Amalco being the successor entity. The Company has acquired certain rights to three classes of novel preclinical small-molecule drug candidates with established *in vitro* proof-of-concept data. The Company has acquired worldwide rights, excluding the People's Republic of China, Hong Kong and Taiwan, to develop and commercialize the kt-2000 series under the terms of a purchase and patent assignment agreement dated March 19, 2021 between Subco and NewGen. The Company has also been granted an exclusive option to the kt-3000 and kt-4000 series under the terms of an Evaluation and Option Agreement with the inventor of the kt-2000 series. The Company is conducting lead optimization research on all three series in collaboration with the University of British Columbia ("UBC") under the terms of a collaborative research agreement.

The Company's head office and registered and records office is located at Suite 105, 1008 Beach Avenue, Vancouver, British Columbia, V6E 1T7.

RAKOVINA THERAPEUTICS INC.

Management's Discussion and Analysis
For the three months ended March 31, 2023

The Company, through its wholly owned subsidiary Rakovina Research Ltd., is principally engaged in the research and development of new cancer treatments based on three novel series of small-molecule DNA-damage response inhibitors ("DDRi").

The DNA-damage response ("DDR") field has become an important area of research in the cancer field. DDR systems are responsible for detecting and repairing damage to the DNA within our cells. Such damage can occur naturally due to errors during DNA replication or can be caused by exposure to mutagens such as ultraviolet light or toxins within the environment. The DDR systems within our cells are essential for cellular survival.

Certain types of cancer are known to take advantage of a defect in one or more of the DDR systems, which can allow a mutation to avoid detection and become entrenched in the cell leading to the formation of a tumor. When this occurs, the cancerous cell loses the function of a critical DDR system and becomes highly reliant on alternative DDR pathways or survival.

There are currently four "first-generation" FDA approved DDR-targeting drugs known as PARP inhibitors, which target an enzyme called poly ADP-ribose polymerase ("PARP"), which is a key component of a DDR pathway called base excision repair ("BER"). First-generation PARP inhibitors have become standard-of-care in the treatment of certain types of breast, ovarian and prostate cancer that harbor a mutation in the BRCA gene. BRCA mutations result in a defect in a cells homologous repair ("HR") system and put a person at an elevated risk of developing these cancers. Cells with HR-defects become heavily reliant on the BER system for survival, and thus are uniquely susceptible to treatment with a targeted therapy such as a PARP-inhibitor which blocks or suppresses BER.

While PARP-inhibitors have greatly improved treatment outcomes for patients whose tumors harbor a BRCA mutation, scientists and clinicians have also gained an understanding of their limitations. Such limitations include a limited ability to enter the brain to treat central nervous system ("CNS") metastases, the emergence of resistance to treatment and limited utility in cancers not harboring a HR-defect. Recent research in the field is focused on the development of next-generation DDRi to address these limitations and further improve treatment outcomes.

The Company is currently conducting lead-optimization and preclinical research in the development of next-generation DDRi at the University of British Columbia ("UBC") pursuant to a research collaboration agreement signed with the university (the "UBC Collaboration Agreement"). The UBC Collaboration Agreement provides us with access to a world class research infrastructure at the Jack Bell Research Center and Robert Ho Research Center in Vancouver, British Columbia including capabilities in molecular pathology, cell imaging, mass spectrometry, protein production and biophysics as well as a vivarium for the conduct of *in vivo* pharmacology and toxicology research. In addition, an associated clinical trial unit has capability and experience in running Phase 1 thru Phase 3 human clinical trials in the cancer field. The research is led by the Company's president, Mads Dugaard, who is also a professor at UBC. The Company's goal is to advance one or more drug candidates into human clinical trials and obtain marketing approval for new cancer therapeutics from Health Canada, the United States Food and Drug Administration and similar international regulatory agencies.

Lead-optimization research conducted in collaboration with UBC evaluates three novel series drug candidates (kt-2000, kt-3000, and kt-4000) against proprietary benchmark target product profiles established for each series of drug candidates. The aim of our research is to demonstrate potential superiority to first-generation DDRi to address significant unmet medical needs in the treatment of cancer.

In general, milestones in lead-optimization and drug discovery research include establishing superiority of kt-2000, kt-3000 and kt-4000 series compounds benchmarked against select FDA-approved anti-cancer therapeutics in relevant *in vitro* and *in vivo* models and confirming preclinical safety, biodistribution and pharmacokinetic profiles within acceptable parameters for medicines in the oncology field. The superiority of kt-2000, kt-3000 and kt-4000 series drug candidates may be established based upon improved efficacy in treatment-resistant tumors and tumors of the central nervous system, improved safety or improved pharmacokinetics and biodistribution compared to FDA-approved PARP inhibitors and other FDA-approved cancer therapeutics.

The primary goal of our lead optimization research program will be realized by selecting one or more lead clinical candidates from the kt-2000, kt-3000 and/or kt-4000 series by achieving the following milestones:

1. Identification of one or more lead drug candidates that meet the proprietary benchmark target product profile demonstrating potential superiority to first-generation DDRi to address significant unmet medical needs in the treatment of cancer; and
2. Demonstration of an acceptable safety, biodistribution and pharmacokinetic profile to support advancement of a lead drug candidate to pivotal toxicology studies and human clinical trials.

RAKOVINA THERAPEUTICS INC.

Management's Discussion and Analysis
For the three months ended March 31, 2023

kt-2000 Series

We acquired worldwide rights, excluding the People's Republic of China, Hong Kong and Taiwan, to develop and commercialize the kt-2000 series through the QT. The kt-2000 series candidates are a patented class of next-generation oral targeted small molecule PARP inhibitors with established *in vitro* and *in vivo* proof of concept. Based on research completed to date, the kt-2000 series lead candidates demonstrate potency comparable to FDA approved PARP-inhibitors and potent anti-cancer activity in preclinical animal models.

The kt-2000 lead candidates are being optimized around potential differentiating factors and competitive advantages, including PARP-1 selectivity and the ability to cross the blood brain barrier. Current FDA-approved PARP inhibitors have limited ability to treat cancer that metastasizes to the brain and exhibit toxicity that has been associated with PARP-2 inhibition. We believe a potent PARP-1 selective, brain-penetrating kt-2000 series drug candidate may provide a significant improvement over the current standard of care.

Research and development activity over the next 12 months will focus on investigation and optimization of multiple lead candidates from the kt-2000 series in preclinical models. Additional kt-2000 series analogues will also be synthesized and evaluated as potential lead candidates.

kt-3000 Series

The kt-3000 series drug candidates are a patented, novel class of bi-functional small-molecule drug candidates designed to potently inhibit PARP and histone deacetylase (HDAC). Our pre-clinical research demonstrates that kt-3000 drug candidates have the potential to overcome acquired treatment resistance to FDA-approved PARP-inhibitors.

Published research demonstrates that inhibiting HDAC restores sensitivity to PARP inhibitors by preventing BRCA activity. The combination of a PARP-inhibitor and an HDAC inhibitor has shown promise in the laboratory but has been highly toxic in the clinical setting. By targeting dual mechanisms in a single molecule, we believe that kt-3000 series drug candidates have the potential to overcome clinical resistance that arises in response to PARP inhibitor treatment without the toxicity observed when combining two separate treatments.

We have presented preclinical data at peer reviewed scientific meetings demonstrating that select kt-3000 candidates retain anti-cancer activity despite the activation of resistance genes compared to an FDA-approved PARP-inhibitor, which loses potency upon re-establishment of BRCA activity. We recently published a manuscript demonstrating that a kt-3000 lead candidate achieves higher efficacy than treatment with single-agent PARP or HDAC inhibitors in pre-clinical models. These data indicate the dual activity of kt-3283 is 30- to 80-times more potent in Ewing sarcoma models than an FDA-approved PARP inhibitor, and 30- to 60-times more potent than an FDA-approved HDAC inhibitor. In an Ewing sarcoma metastasis model, kt-3283 prevented metastatic cancer growth in the lungs of mice inoculated with an aggressive Ewing sarcoma cell line.

We believe that our research provides proof-of-concept to support advancement of kt-3000 lead candidates based on their potential to address unmet medical needs in the treatment of Ewing sarcoma and potentially other cancers including leukemia, breast cancer, liver cancer, glioblastoma, prostate cancer and anaplastic thyroid cancer.

Select kt-3000 series drug candidates have been advanced to pilot toxicology and pharmacology studies. Lead candidates are being evaluated in *in vivo* models to support future regulatory filings to allow initiation of human clinical trials. Additional kt-3000 series analogues will also be synthesized and evaluated as potential lead candidates.

kt-4000 Series

The kt-4000 drug candidates are a patented rationally designed class of small-molecule drug candidates that have been engineered to cause targeted DNA-damage to a tumor cell's DNA while simultaneously inhibiting the tumor's DNA damage response. The kt-4000 series DDR inhibitors molecular structure includes a potent moiety which cause targeted breaks in a tumor cell's DNA strands while also inhibiting DNA-damage repair mechanisms leading to cancer cell death.

We have presented preclinical data at a peer-reviewed scientific meeting demonstrating that select kt-4000 drug candidates cause double-strand DNA breaks while inhibiting PARP-mediated repair resulting in cell-cycle arrest and cancer cell death in a manner distinct from first-generation PARPi.

We believe that kt-4000 series drug candidates have the potential to expand the general utility of DDR-inhibitors to treat tumors that have become or are inherently resistant to first-generation DDRi. During the next 12 months, suitable candidates will be further evaluated in preclinical models.

RAKOVINA THERAPEUTICS INC.

Management's Discussion and Analysis
For the three months ended March 31, 2023

RECENT ACHIEVEMENTS & HIGHLIGHTS

- On May 29, 2023, the Company closed a non-brokered private placement of unsecured convertible debenture units of the Company (the "Debenture Units") for aggregate gross proceeds to the Company of approximately \$1.5 million. Proceeds will be used for research and development expenses primarily to advance its lead kt-3000 dual function DNA-damage response inhibitor program toward human clinical trials and for general working capital purposes.
- On April 19, 2023, we presented new preclinical *in vitro* and *in vivo* data demonstrating the potential of our kt-3000 series against treatment-resistant Ewing sarcoma, a rare childhood tumor, at the annual meeting of the American Association of Cancer Research (AACR).
- On March 30, 2023, we announced the engagement of Red Cloud Securities and Proactive Investors Nort America Inc as part of our evolving strategy to improve trading liquidity and increase awareness of our next-generation cancer therapy development pipeline.
- On March 23, 2023, we announced the extension of the expiry of 11,414,750 common share purchase warrants from March 24, 2023, to March 24, 2024. The exercise price of each warrant remains at \$0.40.
- On March 22, 2023, we announced the receipt of \$122,865 in non-dilutive funding from the National Research Council of Canada industrial Research Assistance Program.
- On March 17, 2023, we presented new preclinical data describing progress in our lead optimization activities for our novel kt-3000 series at the EACR-AACR Basic and Translational Research Conference.
- On January 26, 2023, we announced that our president & chief scientific officer presented an address at the 6th Annual DDR-Inhibitors Summit describing research results supporting the activity of kt-3000 series drug candidate in pre-clinical models of Ewing sarcoma.

SELECTED FINANCIAL INFORMATION

The selected statements of net loss and comprehensive loss data for the periods presented and the selected statement of financial position data as of the dates presented are derived from the unaudited interim condensed consolidated financial statements.

	As at March 31, 2023 \$	As at December 31, 2022 \$
Statements of financial position data:		
Cash and cash equivalents	607,604	896,831
Working capital	493,522	962,553
Intangible assets	4,918,969	5,051,160
Total assets	5,581,440	6,120,761
Total liabilities	168,949	107,048
Deficit	(8,954,176)	(8,312,386)
Total equity	5,412,491	6,013,713
	Three months ended March 31, 2023 \$	Three months ended March 31, 2022 \$
Statements of net loss and comprehensive loss data:		
Research and development	433,344	463,473
General and administrative	212,043	250,074
Finance income	(4,069)	(3,016)
Foreign exchange loss	472	1,422
Net loss and comprehensive loss	(641,790)	(711,953)
Basic and diluted loss per share	(0.01)	(0.01)
Weighted average shares outstanding (basic and diluted)	69,829,500	69,826,633

RESULTS OF OPERATIONS

Research and development expenses

	Three months ended March 31, 2023	Three months ended March 31, 2022
	\$	\$
Contract research	152,250	152,250
Amortization	132,191	132,191
Consulting	93,424	96,933
Chemistry and manufacturing	3,720	-
Share-based payments	27,669	60,924
Patent and legal fees	24,090	21,175
	433,344	463,473

Total research and development expenses were \$433,344 for the three months ended March 31, 2023, versus \$463,473 incurred during the three months ended March 31, 2022.

The primary reason for the slight decrease is related to share-based payments expense of \$27,669 for the three months ended March 31, 2023, versus \$60,924 during the prior year comparative period. The decrease is due to the amortization of the fair value of stock options granted to officers, directors and advisors that are directly involved with the research and development activities of the Company which decreases over time as options vest.

General and administrative expenses

	Three months ended March 31, 2023	Three months ended March 31, 2022
	\$	\$
Legal and professional	61,703	82,064
Corporate communications	43,464	49,654
Share-based payments	12,899	30,329
Consulting	39,000	39,000
Director fees	25,671	34,726
Rent	10,500	7,000
Other expenses	18,805	7,301
	212,043	250,074

General and administrative expenses of \$212,043 were incurred during the three months ended March 31, 2023, compared with \$250,074 incurred in the three months ended March 31, 2022.

The net decrease in general and administrative expenses during the three months ended March 31, 2023, relative to the three months ended March 31, 2022, is primarily due to the following:

- A decrease in Legal and professional fees from \$82,064 for the three months ended March 31, 2022, to \$61,703 for the three months ended March 31, 2023. The decrease is primarily due to non-recurring legal costs incurred during 2022 related to the completion of the Company's base shelf prospectus.
- A decrease in share-based payment expense from \$30,329 for three months ended March 31, 2022, to \$12,899 for the three months ended March 31, 2023. The decrease is due to the amortization of the fair value of stock options granted to officers, directors and advisors that are not directly involved with the research and development activities of the Company which decreases over time as options vest.
- A decrease in Directors fees from \$34,726 for three months ended March 31, 2022, to \$25,671 for the three months ended March 31, 2023. The decrease is due to the reduction in Company directors from five during the prior year comparative period to four during the current period.
- An increase in other expenses from \$7,301 for the three months ended March 31, 2022, to \$18,805 for the three months ended March 31, 2023. The increase is primarily related to travel and conference fees as the Company was more active at industry events and investor meetings and conferences during the current period.

RAKOVINA THERAPEUTICS INC.

Management's Discussion and Analysis
For the three months ended March 31, 2023

Total cash expenses related to research and development and general and administrative expenses were \$472,628 for the three months ended March 31, 2023, versus \$490,103 for the prior comparative period.

The decrease in cash expenses relative to the comparative period is primarily due to a period over period decrease in legal and professional fees as discussed above.

SUMMARY OF QUARTERLY RESULTS

	Mar 31, 2023	Dec 31, 2022	Sep 30, 2022	Jun 30, 2022	Mar 31, 2022	Dec 31, 2021	Sep 30, 2021	Jun 30, 2021
	\$	\$	\$	\$	\$	\$	\$	\$
Net Loss	(641,790)	(647,426)	(715,880)	(715,975)	(711,953)	(751,353)	(737,352)	(835,062)
Basic and diluted loss per share	(0.01)	(0.01)	(0.01)	(0.01)	(0.01)	(0.01)	(0.01)	(0.01)

During the three months ended March 31, 2023, the Company reported a net loss of \$641,790 versus a net loss of \$711,953 for the three months ended March 31, 2022.

The net loss of \$641,790 incurred during the three months ended March 31, 2023, is consistent with the prior seven quarters and is primarily attributable to research and development expenses of \$433,344 and general and administrative expenses of \$212,043.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity and Capital Resources

The Company's capital currently consists of equity and working capital. Its principal source of cash is from the issuance of common shares and warrants. The Company's capital management objectives are to safeguard its ability to continue as a going concern and to have sufficient capital to be able to further its research and development activities.

The Company does not have any externally imposed capital requirements to which it is subject. The Company manages the capital structure and adjusts it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares.

The Company's capital needs are for funds to support its scientific research and development activities, including staffing, lead compound optimization, administrative costs and for working capital. The Company expects that its existing cash and cash equivalents as of March 31, 2023, in conjunction with approximately \$1,500,000 in anticipated proceeds from a convertible debenture offering expected to close during the second quarter of 2023, will enable it to fund operating requirements for at least the next 12 months. However, there is no assurance that the financing will be obtained on terms favorable to the Company or at all. If the financing is not obtained, the Company may be required to take additional measures to address its liquidity needs, including reducing operating expenses or seeking alternative sources of financing.

The process of drug development can be costly, and the timing and outcomes of research related activities is uncertain. The assumptions upon which we have based our estimates are routinely evaluated and may be subject to change. The actual amount of our expenditures will vary depending upon several factors including but not limited to the design, timing and duration of lead optimization studies, the progress of our research and development programs, and the level of financial resources available.

Cash Flows

The following table provides information regarding our cash flows for the three months ended March 31, 2023, and 2022:

	March 31, 2023	March 31, 2022
	\$	\$
Cash used in operating activities	(289,227)	(265,519)
Cash provided by financing activities	-	2,150
Cash provided by investing activities	-	-
Net (decrease) / increase in cash and cash equivalents	(289,227)	(263,369)

RAKOVINA THERAPEUTICS INC.
Management's Discussion and Analysis
For the three months ended March 31, 2023

Cash Flows From Operating Activities

Net cash used in operating activities was \$289,227 during the three months ended March 31, 2023. Net cash used in operating activities for the three months ended March 31, 2023, consisted of a net loss of \$641,790 less non-cash adjustments of \$172,759 and an increase in changes in non-cash working capital of \$179,804. Non-cash adjustments were related to amortization expense of \$132,191 and share-based payments of \$40,568.

Cash Flows From Financing Activities

There was no cash provided from financing activities during the three months ended March 31, 2023. Cash provided from financing activities in the comparative period was related to the exercise of 21,500 agent options.

Contractual Obligations

Pursuant to the UBC Collaboration Agreement the Company has committed to payments as follows:

	<u>\$</u>
March 31, 2023	217,000
September 30, 2023	217,000
	<u>434,000</u>

The \$217,000 payment due on March 31, 2023 was made in April 2023 and will be used to fund research and development activities at UBC up to September 30, 2023. This payment will be amortized on a straight-line basis into net loss and comprehensive loss between April 1, 2023, and September 30, 2023.

OFF-BALANCE SHEET ARRANGEMENTS

As of the date of this MD&A, the Company does not have any off-balance sheet arrangements that have, or are reasonably likely to have, a current or future effect on the results of operations or financial condition of the Company, including, and without limitation to, such considerations as liquidity and capital resources that have not previously been disclosed.

FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company classifies its financial assets into the following specified categories: amortized cost, fair value through other comprehensive income ("FVTOCI"); and fair value through profit or loss ("FVTPL"). Financial liabilities are classified as FVTPL or classified as loans and borrowings measured at amortized cost. Classification depends on the purpose for which the financial assets and liabilities were acquired or incurred. Management determines the classification of its financial instruments at initial recognition.

Financial instruments consist of cash and cash equivalents, amounts receivable, accounts payable and accrued liabilities and due to related parties.

Fair values

The Company has classified its financial instrument fair values based on the required three level hierarchies:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: inputs other than quoted prices included in Level 1, but that are observable for the asset or liability, either directly or indirectly; and

Level 3: inputs for the asset or liability that are not based on observable market data.

The fair value hierarchy level at which a fair value measurement is categorized is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. The Company records cash and cash equivalents at fair value using level 1 inputs. There were no transfers from levels 1, 2 and 3 during the three months ended March 31, 2023.

The fair values of cash and cash equivalents, amounts receivable, due to related parties, and accounts payable and accrued liabilities approximate the carrying values due to the short-term nature of these instruments.

RAKOVINA THERAPEUTICS INC.

Management's Discussion and Analysis
For the three months ended March 31, 2023

There has been no significant change in the credit risk and concentrations, interest rate risk or liquidity risk during the three months ended March 31, 2023.

Financial risk factors

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

Credit risk is the risk of loss associated with the counterparty's inability to fulfill its payment obligations. Financial instruments that potentially subject the Company to concentrations of credit risks consist of cash and cash equivalents and amounts receivable. The Company's cash and cash equivalents consists of funds held in a reputable bank. The amounts receivable is related to GST receivable from the Canada Revenue Agency and accrued interest from a reputable Canadian bank. At March 31, 2023, the Company does not believe it is currently exposed to any significant credit risk.

Interest rate risk

Interest rate risk is the risk that changes in market interest rates may have an effect on the cash flows associated with some financial instruments, known as interest rate cash flow risk, or on the fair value of other financial instruments, known as interest rate price risk. The Company is not exposed to any significant interest rate risk.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. Liquidity risk is managed by maintaining adequate cash reserves and by closely monitoring forecast and actual cash flows. The Company currently settles its financial obligations out of cash. The ability to do this relies on the Company's ability to raise equity financing in a timely manner and by maintaining sufficient cash in excess of anticipated needs.

Foreign currency risk

The Company is exposed to foreign currency risk on fluctuations in foreign exchange rates for any cash, amounts receivable, accounts payable, due to related parties, and accrued liabilities that are denominated in foreign currencies. The Company's foreign currency risk is primarily related to expenses denominated in United States dollars.

There has been no significant change in the credit risk and concentrations, interest rate risk, liquidity risk or foreign currency risk since December 31, 2022.

DIVIDEND POLICY

Since its incorporation, the Company has not paid any dividend on its common shares. Any future determination to pay dividends is at the discretion of the Company's Board of Directors and will depend on the Company's financial condition, results of operations, capital requirements and other such factors as the Board of Directors of the Company may deem relevant.

RELATED PARTY TRANSACTIONS

The key management personnel of the Company are the Directors, Executive Chairman, President and Chief Scientific Officer, Chief Operating Officer, and Chief Financial Officer. Amounts due to related parties, including amounts due to key management personnel, at the period-end are unsecured, interest free and settlement generally occurs in cash. There have been no guarantees provided or received for any related party receivables or payables.

As at March 31, 2023, the Company had amounts due to related parties of \$74,872 (December 31, 2022 - \$79,309) comprised of board fees, management compensation and reimbursable expenses.

RAKOVINA THERAPEUTICS INC.

Management's Discussion and Analysis
For the three months ended March 31, 2023

Pursuant to this consulting agreement, Mr. Hyman is compensated at a rate of \$10,000 per month. During the three months ended March 31, 2023, Tandem charged fees of \$30,000 (2022 - \$30,000) for CFO services. As of March 31, 2023, the Company has included in its accounts payable and accrued liabilities \$10,654 (December 31, 2022 - \$10,500) due to Tandem related to management services plus GST.

The Company pays its independent directors a fixed quarterly fee of \$8,750 plus \$1,875 for the audit committee chair and \$1,000 for audit committee members. As of March 31, 2023, the Company has included in its accounts payable \$8,137 (December 31, 2022 - \$8,137) for Al De Lucrezia, \$8,797 (December 31, 2022 - \$9,312) for Dennis Brown, and \$8,738 (December 31, 2022 - \$8,795) for Michael Liggett related to Director fees.

All related party transactions, whether monetary or non-monetary, are conducted in the normal course of business and are measured at fair value, which is the consideration established and agreed to by the related parties.

OUTSTANDING SECURITIES

As at May 30, 2023, the company has the following securities outstanding:

	#
Common shares	69,829,500
Warrants – Initial financing	11,414,750
Warrants – Convertible debt financing	3,028,000
Stock Options	5,780,000
Total	90,052,250

On May 29, 2023, the Company closed a non-brokered private placement of unsecured convertible debenture units of the Company (the "Debenture Units") for aggregate gross proceeds to the Company of \$1,514,000. Each Debenture unit consists of one \$50,000 unsecured convertible debenture of the company and 100,000 share purchase warrants

RAKOVINA THERAPEUTICS INC.

Management's Discussion and Analysis
For the three months ended March 31, 2023

("Warrants") with each Warrant entitling the holder thereof to acquire one common share of the Company (a "Warrant Share") at a price of \$0.15 per Warrant Share for a period of 30 months. The debentures are repayable in 30 months (unless earlier converted or redeemed) and will accrue interest at a rate of 12% per annum which is due and payable semi-annually in cash or common shares, at the option of the debenture holder. The Debenture holders will have the right to convert the principal amount of the Debenture into common shares of the Company at a conversion price of \$0.20 per share, which would result in the issuance of 7,570,000 common shares. The Company is entitled to redeem each Debenture starting 12 months following the Closing Date by paying a redemption premium on the outstanding principal amount of Debenture equal to 2%, subject to certain limitations.

Escrow

As at the date of this report 9,225,000 common shares are held in escrow and will be released based on the Company's escrow agreements as follows:

	<u>#</u>
October 1, 2023	4,612,500
April 1, 2024	4,612,500
	<u>9,225,000</u>

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Please refer to the Annual Financial Statements for the year ended December 31, 2022.

There has been no changes to the Company's critical accounting policies and estimates for the three months ended March 31, 2023.

RISKS FACTORS

Investing in our securities involves a high degree of risk. Before deciding to invest in our securities, you should carefully consider the risks described in the Company's Annual Information Form, together with other information included in or incorporated by reference into this MD&A and filed on SEDAR at www.sedar.com. If any of the following risks materialize, the business, financial condition, results of operation and future prospects of the Company will likely be materially and adversely affected. This could cause actual future events to differ materially from those described in forward-looking statements and may cause the trading price of our securities to decline.
